EXPERIENCE

Vyomfix Labs Pvt. Ltd.

May 2026 – Present

Software Development Engineer Intern

Bengaluru, India

- Engineered production-grade Go REST APIs processing **10,000+ daily requests**, utilizing **JWT-secured endpoints** and **Role-Based Access Control (RBAC)** to enable seamless frontend integration.
- Optimized SQL queries and implemented **Row-Level Security (RLS)** to eliminate **N+1 bottlenecks**, reducing database latency by **35%** and lowering cloud compute costs by **20%**.
- Integrated Amazon Bedrock and constructed Python (**ai-stack**) **AI pipeline components**, automating extraction workflows for over **5,000 documents monthly**.
- Architected an **S3-based ingestion pipeline** managing **50+ GB** of daily data, enforcing **presigned uploads**, **AES encryption**, and strict **credential management** to mitigate unauthorized access.

PROJECTS

MetroInFlow | [GitHub](#) | React, Tailwind CSS, Supabase, Go, Docker, GCP

Sep 2025 – Dec 2025

- Spearheaded the development of a centralized **Electronic Document Management System (EDMS)** for Kochi Metro (Smart India Hackathon), replacing manual processes and accelerating document workflow efficiency by **40%**.
- Designed a distributed **Go backend** leveraging **goroutines** for asynchronous database polling, effectively offloading heavy **Optical Character Recognition (OCR)** and LLM tasks to dedicated **Python/FastAPI** microservices.
- Deployed containerized APIs and user interfaces across **GCP** and **Render**, establishing secure **Cloudflare Tunnels** to expose local machine learning models with near-zero downtime.

KDE Plugin for Wallpaper Engine | [GitHub](#) | C++17, QML, CMake, Qt6, JSON

Sep 2025 – Present

- Authored a custom **KDE Plasma 6** wallpaper extension to bridge compatibility gaps, enabling native, **60 FPS** playback of **Steam Wallpaper Engine** animated backgrounds on Linux environments.
- Programmed a highly efficient **C++ backend** utilizing a custom **QAbstractListModel** to auto-scan Steam Workshop directories, parsing **project.json** metadata to reliably index **MP4/WebM** assets.
- Formulated a responsive **QML configuration interface** and a robust **CMake build pipeline**, incorporating **Git versioning** and a **CTest suite** to streamline CI/CD-ready system installations.

TECHNICAL SKILLS

Core Competencies: Data Structures & Algorithms (DSA), Distributed Systems Architecture, TCP/IP & DNS Configuration

Languages: C/C++, Go, Python, Java, SQL (PostgreSQL, Supabase), Bash

Developer Tools: Git, Docker, Postman, Kafka, Redis, Jira, Nginx

Libraries: OpenCV, database/sql, net/http, Uvicorn

Frameworks: Qt6, gRPC, FastAPI

Operating Systems: Linux (Arch, Fedora), macOS, Windows

EDUCATION & CERTIFICATIONS

Vellore Institute of Technology

Bhopal, India

Bachelor of Technology in Computer Science and Engineering

Sep 2023 – May 2027

Google IT Support Professional Certificate | [View Folder](#)

Issued Feb 2024

- Completed a five-course specialization covering **TCP/IP, DNS, operating systems, and security fundamentals**.

The Bits and Bytes of Computer Networking | *Google*

Issued Nov 2025

- Mastered the **five-layer network model**, routing algorithms, and infrastructure troubleshooting techniques.

AWARDS & ACHIEVEMENTS

- Silver Medal Winner (Top 1% of 200+ Teams):** Awarded at Health Hackathon 2024 for developing **MargDarshak** ([GitHub](#)), an AI-powered navigation assistant using **YOLOv8n** and real-time text-to-speech.
- National Finalist:** Selected at Health Hackathon 2024 for **HealthMenta.ai** ([GitHub](#)), a diagnostic backend platform engineered for **99.9% uptime** on **Google Cloud Platform (GCP)**.
